#### ***Part 3 Determination of Significance***

For every question in Part 2 that was answered “moderate to large impact may occur”, or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term, long-term and cumulative impacts.

- ☐ Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action may result in one or more potentially large or significant adverse impacts and an environmental impact statement is required.
- ☒ Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action will not result in any significant adverse environmental impacts.

The intent of the local law 260-32 Fences, Walls, and Gates amendment is to:

- Better restrict electric fence usage, maintaining the ability for livestock to be protected while restricting unnecessary electric fencing which is bad for the character of Woodstock and bad for local animals.
- Limit the use of fences made of non-rigid materials as these materials can be bad for local animals who can become trapped in the fence.
- Fencing protection for fruit bearing plants or trees in addition to protections already provided for vegetables to better protect food sources.

These amendments improve environmental protections in our municipality. None of these amendments negatively affect environmental resources in our municipality
